

Product Specification Sheet

15 ft x 10 ft Blank Canopy Tents

15 ft x 10 ft Blank Canopy Tents give you 150 sq ft of solid-color outdoor shelter on a hexagonal aluminum pop-up frame. The canopy fabric is 600 D polyester, water-resistant and UV-treated, with no printing on the surface. These tents are built for buyers who need fast, sturdy outdoor coverage and plan to handle branding separately.

Material

600 D polyester canopy with water-resistant treatment and UV coating.

The 600 D denier rating means the fabric is thick enough to block light rain and resist UV breakdown through regular outdoor use.

Print Method

No printing. Canopy fabric is factory dyed to a solid stock color.

This is why the tent ships faster and costs less than any custom-printed version we build.

Color Output

Solid stock colors only. Typical options include white, black, blue, red, and green.

Color availability may vary by size. There is no CMYK or full-color output on this product.

Finishing

Pop-up scissor frame that expands and locks without tools. Wheeled carry bag included.

The carry bag holds the collapsed frame and canopy together as one unit for transport.

Size

15 ft x 10 ft. Covers roughly 150 sq ft.

Fits multiple tables, an inventory display, and room for customers to step inside.

Indoor/Outdoor Rating

Outdoor use. Expect 2 to 4 years of regular use from the fabric. Aluminum frame typically lasts 5 to 10 years with proper storage.

Single/Double-Sided

Single-sided canopy top. Optional sidewalls (full, half, or window style) sold separately.

Sidewalls attach to the frame for wind protection or added enclosure.

Weight

Frame runs roughly 40 to 60 lbs depending on configuration.

The wheeled carry bag lets one person roll the full package across flat ground.
