

Product Specification Sheet

10 ft x 10 ft Custom Canopy Tents

10 ft x 10 ft Custom Canopy Tents run on a hexagonal aluminum pop-up scissor frame. The 600 D polyester canopy prints in full-color dye sublimation on the top and all four valances. This product covers a standard vendor booth slot and is built for weekly outdoor use across roughly 2 to 3 seasons.

Material

600 D polyester with water-resistant coating and UV treatment on the outer surface.

Thick, tightly woven fabric blocks light rain and resists fading under direct sun for 2 to 3 seasons.

Print Method

Full-color dye sublimation, ink bonded directly into the polyester fibers.

Graphics do not sit on the surface, so they cannot crack, peel, or wash off with normal use.

Color Output

CMYK full-color output across the canopy top and all four valances.

Any logo, photo, or brand graphic prints accurately across the full canopy surface.

Finishing

Pop-up scissor frame with hexagonal aluminum tubing. Wheeled carry bag included.

The full tent system travels as one unit, frame and canopy packed together in the bag.

Size

10 ft x 10 ft canopy footprint.

Fits a 6 ft table, 2 chairs, and customer standing space inside a standard vendor slot.

Indoor/Outdoor Rating

Rated for outdoor use. Water-resistant fabric handles light rain. UV-treated surface holds color through roughly 2 to 3 seasons of regular outdoor use.

Sided

Single-sided canopy top printing standard. Optional sidewall printing available on full walls, half walls, and window walls ordered separately.

Weight

Frame weighs roughly 40 to 60 lbs depending on frame material. Aluminum sits at the lighter end of that range, making solo transport manageable from vehicle to booth.
