

Product Specification Sheet

13 ft x 13 ft Custom Canopy Tents

13 ft x 13 ft Custom Canopy Tents cover 169 sq ft of floor space on a hexagonal aluminum pop-up frame. The canopy is 600 D polyester printed in full-color dye sublimation. This size fits a multi-table vendor display, inventory staging, and room for customers to walk in. It's the right pick when a standard 10x10 ft booth leaves you short on space.

Material

600 D polyester canopy fabric, water-resistant and UV-treated.

Denier (D) measures thread thickness. 600 D is a heavy-duty outdoor fabric that resists tearing and holds its shape in moderate wind.

Print Method

Dye sublimation heat-transfers ink directly into the polyester fibers.

Color becomes part of the fabric, not a surface coating, so it won't crack or peel after repeated setups.

Color Output

CMYK full-color across the canopy top and all valance panels.

Photographic images, gradients, and multi-color logos print without color restrictions.

Finishing

Pop-up scissor frame. Wheeled carry bag included with every order.

The frame expands and locks without tools in roughly 5 to 10 minutes.

Size

13 ft x 13 ft (169 sq ft of covered floor space). Peak height runs roughly 10 to 11 ft at the canopy center.

That peak height clears standing displays, banner stands, and most signage without adjustment.

Indoor/Outdoor Rating

Rated for outdoor use. Expect 2 to 3 seasons of regular market and event use before noticeable fading.

UV treatment slows color loss in direct sun. Water-resistant fabric sheds light rain.

Single/Double-Sided

Single-sided printing on the canopy top and valances is standard. Optional sidewalls print on one side.

Full, half, and window panel sidewalls attach to the frame and are available with custom graphics.

Weight

Aluminum frame weighs roughly 40 to 60 lbs depending on frame configuration.

The wheeled carry bag handles transport so you're rolling the load, not lifting it.
