

Product Specification Sheet

15 ft x 10 ft Custom Canopy Tents

15 ft x 10 ft Custom Canopy Tents run on a hexagonal aluminum frame with a 600 D polyester canopy. Full-color dye sublimation prints across the top and valances. This is the right shelter for outdoor vendors and exhibitors who need 150 sq ft of covered, branded floor space in a single pop-up structure.

Material

600 D polyester canopy fabric, UV-treated and water-resistant.

Tightly woven at 600 denier, it resists tearing at edges through repeated outdoor setup cycles.

Print Method

Full-color dye sublimation.

Ink bonds into the polyester fibers under heat, so the print does not sit on the surface and won't crack.

Color Output

CMYK full color across canopy top and valances.

Cyan, magenta, yellow, and black combine to reproduce logos, gradients, and photographic images accurately.

Finishing

Pop-up scissor frame. Wheeled carry bag included.

The scissor mechanism locks without tools and the bag holds the full collapsed kit for transport.

Size

15 ft x 10 ft. Coverage area is 150 sq ft.

Fits multiple tables, an inventory display, and open floor space for customers inside.

Indoor/Outdoor Rating

Outdoor use. Water-resistant canopy with UV treatment.

Expect 2 to 3 seasons of regular outdoor use before noticeable fading under direct sun.

Sided

Single-sided canopy top and valance printing standard. Optional sidewall printing available.

Add printed sidewalls for branding on all four sides of your booth.

Weight

Roughly 40 to 60 lbs depending on frame material. Hexagonal aluminum sits at the lighter end.

Two people can carry the collapsed kit from a vehicle to a booth space without a cart.
