

Product Specification Sheet

20 ft x 10 ft Custom Canopy Tents

20 ft x 10 ft Custom Canopy Tents run on a hexagonal aluminum frame with a 600 D polyester canopy printed in full-color dye sublimation. This is the right size for multi-vendor setups, double booth spaces, and large outdoor event footprints where a standard 10 ft x 10 ft tent is not enough.

Material

600 D polyester, water-resistant and UV-treated.

Heavier denier means a tighter weave that holds ink longer and resists tearing under wind load.

Print Method

Dye sublimation directly into polyester fibers under heat.

Ink bonds into the fabric, so it cannot peel or crack the way surface-applied ink can.

Color Output

CMYK full color across the canopy top and all valances.

Four ink channels (cyan, magenta, yellow, black) reproduce logos, photos, and gradients accurately.

Finishing

Pop-up scissor frame. Wheeled carry bag included with every order.

Frame expands and locks without tools in roughly 5 to 10 minutes.

Size

20 ft x 10 ft footprint. 200 sq ft of sheltered ground.

Fits a double booth space or a large single-vendor setup with room for customers inside.

Indoor/Outdoor Rating

Outdoor use. Expect 2 to 3 seasons of regular use before noticeable fading in direct sun.

Indoor storage between events extends that lifespan further.

Single/Double-Sided

Canopy top and valances print single-sided. Optional sidewall printing adds branding on up to three enclosed sides.

Half walls keep the booth open while still carrying your logo.

Weight

Hexagonal aluminum frame weighs roughly 40 to 60 lbs depending on final configuration.

The wheeled carry bag handles that load so you are not lifting it by hand.
