

Product Specification Sheet

20 ft x 13 ft Custom Canopy Tents

20 ft x 13 ft Custom Canopy Tents cover roughly 260 sq ft on a hexagonal aluminum frame with a 600 D polyester canopy printed in full-color dye sublimation. This size suits multi-vendor setups, sports sidelines, and large outdoor brand activations where a single shelter needs to carry the whole event footprint.

Material

600 D polyester canopy with water-resistant and UV-treated coating.

The 600 D weave (denier counts thread thickness) gives the canopy a sturdy, thick feel that resists tearing at grommets under wind load.

Print Method

Full-color dye sublimation transfers CMYK ink directly into the polyester fibers using heat.

The result is a smooth, fade-resistant graphic that does not crack or peel off the fabric surface.

Color Output

CMYK full color across the entire canopy top and valances.

Gradients, photos, and multi-color logos all reproduce without banding or color shift.

Finishing

Pop-up scissor frame that expands and locks without tools. Wheeled carry bag included on every order.

Size

20 ft x 13 ft. Covers roughly 260 sq ft of ground.

Indoor/Outdoor Rating

Rated for outdoor use. Expect 2 to 3 seasons of regular use before noticeable fading.

Single/Double-Sided

Single-sided canopy top printing standard. Optional sidewall printing available on full walls, half walls, and window walls ordered separately.

Weight

Frame weight runs roughly 40 to 60 lbs depending on frame material. The hexagonal aluminum frame sits at the lighter end of that range.
