

Product Specification Sheet

20 ft x 20 ft Custom Canopy Tents

20 ft x 20 ft Custom Canopy Tents cover roughly 400 sq ft on a hexagonal aluminum frame with a full-color dye sublimation canopy. This size is built for multi-vendor setups, large outdoor events, and any situation where a standard single-booth tent falls short.

Material

600 D polyester canopy fabric, UV-treated and water-resistant.

Tight 600 D weave blocks UV rays and sheds light rain without sagging across the full 20 ft span.

Print Method

Full-color dye sublimation bonded directly into the polyester fibers.

Ink bonds into the fabric, so the graphic does not sit on the surface where it can crack or peel.

Color Output

CMYK full color across cyan, magenta, yellow, and black.

Bold logos and photographic graphics both reproduce accurately across the full canopy top and valances.

Finishing

Pop-up scissor frame. Wheeled carry bag included with every order.

Frame expands and locks without tools. Bag transports the collapsed frame and canopy as one unit.

Size

20 ft x 20 ft footprint. Roughly 400 sq ft of sheltered space.

Largest square canopy size in our lineup.

Indoor/Outdoor Rating

Outdoor use. Water-resistant and UV-treated for 2 to 3 seasons of regular outdoor exposure.

Store indoors between events to extend canopy life beyond typical outdoor wear.

Single/Double-Sided

Single-sided canopy top printing. Optional sidewall panels (full, half, or window style) available with custom printing on request.

Sidewalls ordered with your tent match the print run for consistent color across all panels.

Weight

Aluminum frame runs roughly 40 to 60 lbs depending on frame configuration.

Two people are recommended for setup and transport at this size.
