## 26 ft x 13 ft Custom Canopy Tents

26 ft x 13 ft Custom Canopy Tents give you the largest canopy in our lineup, built on a hexagonal aluminum frame with 600 D polyester fabric. This tent is built for extra-large event setups, multi-vendor areas, and sports sidelines where a standard booth does not cover enough ground.

### Material

600 D polyester with water-resistant coating and UV treatment.

The 600 D weave is thick enough to block direct sun and shed light rain without stretching or thinning after repeated setups.

### Print Method

Full-color dye sublimation.

Ink bonds into the polyester fibers under heat, so color does not crack, peel, or wash off the surface.

### Color Output

CMYK full color across canopy top and all four valances.

Cyan, magenta, yellow, and black combine to reproduce brand colors, gradients, and photographic artwork accurately.

### Finishing

Pop-up scissor frame that expands and locks without tools. Wheeled carry bag included with every order.

### Size

26 ft x 13 ft, covering roughly 338 sq ft. Fits double-wide and end-cap vendor slots.

### Indoor/Outdoor Rating

Outdoor use. Water-resistant, UV-treated fabric holds up through 1 to 2 seasons of regular outdoor use. Store dry between events.

### Single/Double-Sided

Single-sided canopy top and valance printing. Optional printed sidewalls (full, half, or window panels) available as add-ons.

### Weight

Frame runs 40 to 60 lbs depending on frame material. The aluminum frame sits at the lighter end, making a 2-person carry manageable.
