

Product Specification Sheet

8 ft x 8 ft Custom Canopy Tents

8 ft x 8 ft Custom Canopy Tents cover roughly 64 sq ft of ground space on a hexagonal aluminum pop-up frame. The canopy fabric runs 600 D polyester with a water-resistant treatment and UV coating. This tent is built for outdoor vendors, sports sidelines, and booth spaces where one person needs a fast, branded setup.

Material

600 D polyester canopy with water-resistant treatment and UV coating.

The 600 D rating measures thread density. A thicker weave resists tearing and holds its shape in wind.

Print Method

Full-color dye sublimation.

Heat transfers ink directly into the polyester fibers for a smooth, fade-resistant graphic that won't crack or peel.

Color Output

CMYK full color across canopy top and valances.

Any logo, photo, or graphic in your brand colors prints accurately at this output mode.

Finishing

Pop-up scissor frame (a scissor-style frame that expands and locks without tools).

Wheeled carry bag included. Optional sidewalls sold separately.

Size

8 ft x 8 ft. Fits one 6 ft table and 1 to 2 chairs with standing room behind the table.

Indoor/Outdoor Rating

Outdoor use. Water-resistant canopy handles light rain. UV-treated fabric holds color through 1 to 2 seasons of regular outdoor use. Not rated for permanent year-round installation.

Single/Double-Sided

Single-sided canopy top printing. Valances print on the outer-facing side. Optional sidewalls available with single-sided printing.

Weight

Roughly 40 to 60 lbs depending on frame material. The hexagonal aluminum frame sits closer to 40 lbs, making solo transport easier than a steel frame of the same size.
