

Product Specification Sheet

Custom Dry Erase A-Frame Signs

Custom Dry Erase A-Frame Signs are double-sided sidewalk signs built on a molded plastic frame, with white dry-erase panels and interchangeable coroplast inserts included. They suit restaurants, cafes, and retail shops that need to change their sidewalk message daily. No reprinting needed.

Material

White or black molded plastic frame. Includes 36 in x 24 in white dry-erase panels. Coroplast inserts (corrugated plastic, lightweight and weather-resistant) slide in for printed graphics.

Print Method

CMYK full-color UV print applied directly to coroplast inserts.

UV ink cures under ultraviolet light for a scratch-resistant, waterproof finish on the sidewalk.

Color Output

Full-color CMYK on coroplast inserts. Dry-erase panel accepts any standard dry-erase marker and wipes clean with a dry cloth.

Finishing

Coroplast inserts slide into the frame and are interchangeable. Dry-erase panel attaches using included Velcro, so assembly takes only a few minutes.

Size Range

Overall frame is 45 in x 25 in. Dry-erase panel is 36 in x 24 in, the standard sidewalk A-frame insert size.

Indoor/Outdoor Rating

Suitable for indoor and outdoor use. UV-printed coroplast inserts hold up 6 to 12 months outdoors in direct sun. Dry-erase panels last indefinitely with proper care.

Single/Double-Sided

Double-sided display. Both faces stay visible to foot traffic from either direction, so one sign covers both sides of a sidewalk entrance.

Weight

Roughly 15 lbs. The built-in handle lets one person carry the frame in and out each day without help.
