

Product Specification Sheet

Curved Tension Fabric Backdrops

Curved Tension Fabric Backdrops use a snap-together aluminum EZ Tube frame with a dye-sublimated polyester pillow-case graphic. They suit trade show backwalls, conference stages, and branded photo environments where a flat wall doesn't give you enough visual depth. Three sizes cover tabletop through full floor-standing setups.

Material

Polyester fabric pillow-case sleeve over aluminum EZ Tube frame.

The sleeve zips around the frame, hiding all hardware and leaving a smooth, clean curved surface.

Print Method

Dye sublimation (ink converts to gas and bonds into the polyester fibers directly).

Colors stay bold and washable because the ink lives inside the fiber, not on top of it.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black combined to reproduce any color in your artwork).

Runs on every curved backdrop we print, no color limits.

Finishing

Pillow-case sleeve zips on and off the frame, so you swap graphics without replacing hardware.

The frame stays in service while only the fabric changes.

Size Range

6 ft tabletop. 8 ft floor-standing. 10 ft floor-standing.

The 6 ft version sits on a table surface. The 8 ft and 10 ft versions stand on the floor.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain.

Expect reliable performance through repeated indoor events.

Single/Double-Sided

Single-sided or double-sided available.

Double-sided suits island setups where attendees approach from both directions.

Weight

Roughly 8 to 25 lbs depending on size and single or double-sided graphic.

Carry bag is included with all three sizes.
