Product Specification Sheet

Heart Shaped Tension Fabric Backdrops

Heart Shaped Tension Fabric Backdrops combine a polyester pillow-case graphic with a snap-together aluminum EZ Tube frame to hold the heart silhouette smooth and taut. These backdrops are built for indoor wedding ceremonies, engagement parties, and Valentine's brand activations where the shape itself is the focal point.

Material

Polyester fabric, pillow-case style.

The fabric sleeve zips around the EZ Tube frame and stretches taut so the printed surface sits smooth with no visible wrinkles when properly tensioned.

Print Method

Dye sublimation.

Ink converts to a gas under heat and bonds into the polyester fibers rather than sitting on top. Color stays crisp and does not crack or peel after repeated use.

Color Output

Full-color CMYK.

CMYK is the 4-color printing process using cyan, magenta, yellow, and black to reproduce any color across the full heart surface.

Finishing

Pillow-case sleeve over aluminum EZ Tube snap-together frame.

The frame assembles without tools and the graphic zips on after the frame is standing.

Size Range

Heart shape. Widths vary by configuration.

Contact us for the exact footprint of the heart silhouette you need so your venue space fits the display comfortably.

Indoor/Outdoor Rating

Indoor use only.

The polyester fabric absorbs moisture and the EZ Tube frame is not rated for outdoor wind or rain.

Single/Double-Sided

Single-sided standard.

The heart shape is a freestanding display with a finished front face and a visible frame back, so single-sided printing is the correct choice.

Weight

8 to 25 lbs depending on display size.

A carry bag is included so you can transport the frame and graphic together between venues without extra packaging.
