

Product Specification Sheet

Round Tension Fabric Backdrops

Round Tension Fabric Backdrops run on a snap-together aluminum EZ Tube frame with a pillow-case polyester graphic that zips on and off. The circular structure gives you full 360-degree graphic coverage with no back side. These displays suit island booths, product reveal stages, and any center-of-room installation where traffic approaches from all directions.

Material

Pillow-case polyester fabric sleeve that zips around the EZ Tube aluminum frame.

The stretch keeps the graphic taut and smooth with no visible wrinkles when properly tensioned.

Print Method

Dye sublimation converts ink into a gas that bonds directly into the polyester fibers.

Colors stay bold and do not sit on the surface where they can crack or scratch.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black) across the entire circular graphic surface.

Every shade in your design reproduces accurately across the full round display.

Finishing

Pillow-case sleeve graphic zips around the aluminum EZ Tube frame and hides all hardware.

Only the printed fabric is visible from any angle around the circle.

Size Range

Round configurations available. Confirm your diameter at order before production starts.

The EZ Tube frame ships in tube sections that reassemble to the full circle on-site.

Indoor/Outdoor Rating

Indoor use only. Polyester fabric absorbs moisture and the frame is not rated for wind or rain.

Expect a long indoor lifespan with proper care and storage between events.

Single/Double-Sided

Single-sided standard. The graphic wraps the full exterior of the circle.

All visible surface area carries your design with no blank panels facing any direction.

Weight

8 to 25 lbs depending on display size. Carry bag ships with every order.

Transport does not need a separate case or cart for most event setups.
