

Product Specification Sheet

Straight Tension Fabric Backdrops

Straight Tension Fabric Backdrops are flat-wall fabric displays built on a snap-together EZ Tube aluminum frame with a pillow-case polyester graphic that zips on and off. They're the go-to choice for trade show backwalls, corporate event stages, and branded photo walls where a clean rectangular surface is needed. Three widths cover most booth and stage layouts.

Material

Polyester fabric, pillow-case style.

The graphic sleeve zips around the EZ Tube frame and stretches taut, hiding all hardware from the front viewing side.

Print Method

Dye sublimation.

Ink bonds directly into the polyester fibers under heat, so color cannot peel, crack, or sit on the surface.

Color Output

Full-color CMYK.

All four ink channels run on every order, so gradients, photography, and multi-color logos reproduce accurately.

Finishing

Pillow-case sleeve.

The graphic wraps all four frame edges and zips closed at the back, keeping the front surface smooth and hardware-free.

Size Range

8 ft, 10 ft, and 20 ft display widths.

Each width gives you the maximum usable graphic area of any backdrop configuration at that size.

Indoor/Outdoor Rating

Indoor use only.

Polyester absorbs moisture and the EZ Tube frame is not rated for outdoor wind or rain.

Single/Double-Sided

Single-sided standard. Double-sided available.

Choose double-sided for island configurations where both faces of the display are visible to attendees.

Weight

Roughly 8 to 25 lbs depending on display size.

A carry bag is included with every unit so the frame breaks down into tube sections for easy transport.
