

Product Specification Sheet

U Shaped Tension Fabric Backdrops

U Shaped Tension Fabric Backdrops run on a 1.25 in diameter aluminum EZ Tube frame with a zip-on polyester pillow-case graphic covering all three walls. They're built for indoor branded enclosures at trade shows, corporate stages, and photography studios. Widths run from 5 ft to 20 ft across the full U configuration.

Material

Polyester fabric pillow-case sleeve that zips around the aluminum EZ Tube frame on all three walls.

Fabric pulls tight as it zips, giving you a smooth, flat surface with no visible hardware.

Print Method

Dye sublimation (ink converts to gas and bonds directly into the polyester fibers).

Colors stay bold and the surface stays smooth through repeated folding and transport.

Color Output

Full-color CMYK across the entire three-wall surface.

Logos, gradients, and photographic images all reproduce with sharp detail on every panel.

Finishing

Pillow-case sleeve zips around the frame on all three sides, stretching tight and hiding the aluminum tubing completely.

No grommets, no pole pockets, no exposed hardware on the outward-facing surface.

Size Range

Widths from 5 ft to 20 ft across the full U shape.

Check the product configurator for exact side wall depth at each width.

Indoor/Outdoor Rating

Indoor use only. Polyester fabric absorbs moisture and the EZ Tube frame is not rated for outdoor wind.

Expect years of use indoors with proper care and storage after each event.

Single/Double-Sided

Single-sided standard. The graphic prints on the outward-facing surface of all three walls.

Double-sided does not apply because the interior faces the exhibitor, not attendees.

Weight

8 to 25 lbs total, depending on width and number of frame sections. Carry bag included with every order.
