

Product Specification Sheet

1x3 Micro GeoMetrix Tabletop Display

The 1x3 Micro GeoMetrix Tabletop Display runs on a 240g elastic polyester fabric panel system attached magnetically to an aluminum pop-up grid frame. One panel wide by three panels tall, it sits at the end of a 4 ft, 6 ft, or 8 ft table. Setup takes under 5 minutes without tools.

Material

240g elastic polyester fabric.

Thick, stretch-resistant fabric holds taut on the frame and resists creasing during transport and storage.

Print Method

Dye sublimation.

Ink converts to a gas under heat and bonds into the polyester fibers, so colors stay sharp and do not peel.

Color Output

Full-color CMYK.

All four ink channels print on every order, so gradients, photography, and multi-color logos reproduce accurately.

Finishing

Magnetic panel attachment with aluminum pop-up grid frame.

Panels snap onto sewn-in magnetic edge strips and remove just as easily for replacement or washing.

Configuration

1x3 grid. One panel wide by three panels tall.

Narrow vertical column sized for end-of-table placement on 4 ft, 6 ft, or 8 ft tables.

Indoor/Outdoor Rating

Indoor use only.

Typical indoor display life runs well beyond 12 months with proper storage between events.

Panel Attachment

Magnetic panel system. No clips, no velcro, no tools needed.

Panels align and attach in seconds along the frame edges.

Portability

Carry bag included. Lightest configuration in the Micro GeoMetrix line.

The aluminum frame collapses flat and panels stack inside the same bag.
