

Product Specification Sheet

2x2 Micro GeoMetrix Tabletop Display

The 2x2 Micro GeoMetrix Tabletop Display runs on 240g elastic polyester fabric stretched over an aluminum pop-up grid frame. It's built for indoor tabletop use: trade show booths, registration counters, and client-facing sales setups. Four magnetic panels attach without tools and the whole kit collapses into a carry bag.

Material

240g elastic polyester fabric on an aluminum pop-up grid frame.

A thick, stretch-knit fabric that pulls taut over the frame so the graphic surface stays smooth and flat.

Print Method

Dye sublimation.

Ink converts to gas under heat and bonds into the polyester fibers, so colors don't crack or peel.

Color Output

Full-color CMYK.

Cyan, magenta, yellow, and black combine to reproduce any brand color across all 4 panels.

Finishing

Aluminum pop-up grid frame with magnetic panel attachment. No clips or tools needed.

Configuration

2x2 grid: 2 panels wide by 2 panels tall. Square, balanced footprint. Fits on 4 ft tables and most reception counters.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain. Panels are machine washable, which extends usable life.

Panel Attachment

Magnetic strips sewn into panel edges snap directly onto the aluminum grid frame. Panels remove just as easily for replacement or washing.

Weight and Portability

Weight varies by configuration. The 2x2 is among the lighter Micro GeoMetrix setups. Carry bag included with every kit.
