

Product Specification Sheet

2x3 Micro GeoMetrix Tabletop Display

The 2x3 Micro GeoMetrix Tabletop Display runs a 2-panel-wide by 3-panel-tall rectangular grid on an aluminum pop-up frame. Each panel is 240g elastic polyester attached magnetically, making it the mid-size option in the rectangular Micro GeoMetrix family. It fits 6 ft tables best and is built for indoor use only.

Material

240g elastic polyester fabric.

Thick, stretch-knit construction pulls taut over the aluminum grid so each panel sits flat with no bunching.

Print Method

Dye sublimation.

Ink converts to a gas under heat and bonds into the polyester fibers so color cannot sit on the surface and peel.

Color Output

Full-color CMYK.

Cyan, magenta, yellow, and black combine to reproduce any brand color consistently across all six panels.

Finishing

Magnetic panel attachment.

Magnetic strips are sewn into each panel edge and snap directly onto the aluminum grid frame with no tools.

Configuration

2x3 rectangular grid (2 panels wide, 3 panels tall).

Mid-size option in the Micro GeoMetrix rectangular family, sized for 6 ft tables.

Indoor/Outdoor Rating

Indoor use only.

The 240g elastic polyester and magnetic panel system are not rated for outdoor wind or rain.

Single/Double-Sided

Single-sided, multi-panel print.

Each panel carries your full-color graphic on the front face. The back faces the table.

Portability

Carry bag included.

The aluminum grid frame collapses and panels stack flat, fitting together in the included carry bag.
