

Product Specification Sheet

Triangular Large Micro GeoMetrix Tabletop Display

The Triangular Large Micro GeoMetrix Tabletop Display runs 240g elastic polyester panels on an aluminum grid frame in a 3-sided pyramid configuration. It's the largest triangular option in the Micro GeoMetrix system and sits on an 8 ft table. Indoor use only.

Material

240g elastic polyester fabric.

A thick, stretch-knit material that pulls taut over the aluminum frame so the graphic surface stays smooth and wrinkle-free.

Print Method

Dye sublimation.

Ink converts to a gas under heat and bonds directly into the polyester fibers, so colors stay crisp and won't crack or peel.

Color Output

Full-color CMYK.

Cyan, magenta, yellow, and black combine to reproduce your brand colors accurately across all 3 visible faces.

Finishing

Magnetic panel attachment.

Each panel has magnetic strips sewn into the edges that snap onto the aluminum grid frame without clips, velcro, or tools.

Configuration

Triangular large. Three-sided pyramid shape. Sized for 8 ft tables where maximum 3-directional coverage is the goal.

Indoor/Outdoor Rating

Indoor use only.

The magnetic panel system and elastic polyester fabric are not rated for outdoor wind or rain.

Sided

3 outward-facing panels, each carrying a separate full-color printed graphic. Not double-sided in the traditional sense.

Portability

Carry bag included.

The aluminum grid frame collapses and panels stack flat inside the bag for one-person transport and setup.
