

Product Specification Sheet

Triangular Small Micro GeoMetrix Tabletop Display

The Triangular Small Micro GeoMetrix Tabletop Display is a compact, three-sided pyramid structure built for table surfaces. It runs 240g elastic polyester fabric on an aluminum pop-up grid frame with magnetic panel attachment. It's the most compact triangular option in the Micro GeoMetrix line, sized for reception counters, small tables, and tight tabletop booth spaces.

Material

240g elastic polyester fabric on an aluminum pop-up grid frame.

This thick, stretch-knit fabric pulls taut over the frame so each triangular panel face stays smooth and wrinkle-free.

Print Method

Dye sublimation.

Ink converts to a gas under heat and bonds into the polyester fibers, so colors don't crack or peel after repeated setups.

Color Output

Full-color CMYK.

Cyan, magenta, yellow, and black combine to reproduce any brand color across all three visible panel faces.

Finishing

Magnetic panel attachment.

Magnetic strips sewn into each panel edge snap onto the aluminum grid frame with no clips, velcro, or tools needed.

Configuration

Triangular small. Three-sided pyramid shape, most compact triangular option in the line.

Sized for reception counters, small tables, and tabletop booth spaces under roughly 3 ft wide.

Indoor/Outdoor Rating

Indoor use only.

The 240g elastic polyester and magnetic panel system are not rated for outdoor wind or rain.

Sided

Three visible faces.

Each side of the pyramid carries a full printed panel, showing your brand from 3 directions at once.

Portability

Carry bag included.

The aluminum frame collapses and panels stack flat so the full kit travels between events in one bag.
