

Product Specification Sheet

Adjustable Banner Stands

Adjustable Banner Stands use a telescoping aluminum frame with a polyester fabric graphic that clips directly to the poles. They're built for indoor event use and sized to fit different booth footprints from one set of hardware. Here's the thing: no other stand in this category adjusts both width and height.

Material

Polyester fabric graphic. Aluminum telescoping frame.

Fabric folds flat for transport and clips to the frame without tools.

Print Method

Dye sublimation.

Ink converts to a gas and bonds into the polyester fibers, so colors don't crack or peel.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black combined).

Reproduces logos, photos, and gradients accurately across the full graphic face.

Finishing

Clip-on attachment to adjustable aluminum frame. No cassette. No retractable housing.

Frame collapses and graphic folds separately into the carry bag.

Size Range

Frame telescopes to fit different graphic widths and heights.

Confirm your graphic dimensions match your frame settings before ordering.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain.

Best life at trade shows, conferences, lobbies, and retail spaces.

Single/Double-Sided

Single-sided standard.

Position the stand with the printed face toward your audience.

Weight

Lightweight aluminum hardware. No heavy base cassette.

Total packed weight is lower than most retractable stands. Carry bag included with every order.
