

Product Specification Sheet

EZ Extend Tension Fabric Displays

EZ Extend Tension Fabric Displays use a polyester tension fabric graphic stretched over a collapsible aluminum frame. The pillow-case sleeve zips around the frame and hides all hardware from the front and sides. These displays suit buyers who want a smooth, hardware-free fabric face in a portable floor-standing format without the cost of a full backdrop system.

Material

Tension fabric graphic on polyester. Collapsible aluminum frame.

The frame holds the fabric taut so the front face stays smooth and hardware-free.

Print Method

Dye sublimation.

Ink bonds directly into polyester fibers, giving colors a bold, saturated finish that does not crack or peel.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black 4-color process).

Reproduces logos, photos, and gradients accurately across the full graphic face.

Finishing

Pillow-case sleeve.

The fabric graphic zips around the aluminum frame, hiding all connectors and hardware from view.

Size Range

Multiple display types and sizes available. (See configurator for exact dimensions.)

Total unit weight of 8 to 25 lbs covers the full span of sizes in this line.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain.

Bring the display inside between events to protect the fabric and frame.

Single/Double-Sided

Both options available.

Single-sided suits wall-facing positions. Double-sided suits open-floor setups where both faces are visible.

Weight

Roughly 8 to 25 lbs depending on display type and size.

Carry bag is included with every order.
