

Product Specification Sheet

Korean Style X Banner Stands

Korean Style X Banner Stands use a vinyl graphic hooked onto a lightweight aluminum X-shaped frame. Four adjustable arms pull the graphic flat under corner tension, no tools needed. Best for indoor trade show floors, retail interiors, and any setup where low cost per stand matters most.

Material

Vinyl graphic on a smooth PVC surface. Aluminum X-shaped frame hooks onto 4 corner points and holds the graphic flat under tension.

Print Method

Eco-solvent printing.

Ink bonds to the vinyl surface and stays sharp without cracking or peeling under normal indoor handling.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black combined to reproduce any color in your artwork).

No color limits on logos or photography.

Finishing

Graphic hooks onto 4 adjustable aluminum arms at the corners.

No cassette mechanism. The vinyl rolls for transport and stores in the included carry bag.

Indoor/Outdoor Rating

Indoor use only.

Not rated for outdoor wind or rain. Best for trade show floors, retail interiors, lobbies, and conference spaces.

Single/Double-Sided

Single-sided standard.

The X-frame sits behind the graphic, so the back of the stand remains visible. Double-sided is not available on this frame type.

Hardware

Aluminum X-shaped frame with 4 adjustable arms.

Lightest hardware in the banner stands category. Tool-free assembly.

Carry Bag

Included with every unit at no extra cost.

Fits the collapsed frame and rolled vinyl graphic together for transport between venues or booth positions.
