

Product Specification Sheet

L Banner Stands

L Banner Stands use a vinyl graphic on an L-shaped aluminum support pole with a wider base than an X-banner frame. The graphic hooks at the top and anchors at the bottom with a tension rod, keeping the face flat and taut. Best for retail, lobby, and trade show secondary display positions indoors.

Material

Vinyl graphic on an aluminum L-shaped support pole. The smooth vinyl surface holds crisp color under indoor lighting.

Print Method

Eco-solvent printing. Ink bonds to the vinyl so colors stay bold under normal indoor conditions.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black combined to reproduce any brand color). Runs on every graphic we print.

Finishing

Graphic hooks at the top of the L-shaped pole and anchors at the bottom with a tension rod. Keeps the banner flat.

Size Range

Sized to standard L Banner Stand dimensions. Confirm your display dimensions before uploading artwork.

Indoor/Outdoor Rating

Rated for indoor use only. Not rated for outdoor wind or rain. Typical indoor display life runs 12 months or longer with normal care.

Single/Double-Sided

Single-sided printing standard. The L-shaped pole sits behind the graphic so the front face is fully visible.

Hardware Weight

Roughly 8 lbs total with graphic. Light enough for one person to carry and set up alone.
