

Product Specification Sheet

Circle Pop Out Banners

Circle Pop Out Banners use a spring steel frame and 65g peach skin fabric printed with dye sublimation on both faces. The round format stands freestanding without wall or ceiling support, making it the fastest 360-degree display option for center-of-room trade show placement. Every unit ships with a carry bag included.

Material

65g peach skin fabric (lightweight, soft-texture polyester).

Accepts dye sublimation ink cleanly and folds flat without cracking the printed surface.

Print Method

Dye sublimation.

Ink bonds directly into polyester fibers so color does not sit on the surface and does not peel.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black combined to reproduce the full color spectrum).

Every circle pop out banner we print runs full CMYK on both faces.

Finishing

Spring steel frame (a coiled steel structure that holds tension and pops open when released).

No cassette, no pole, no tools needed at setup or teardown.

Size Range

Circle format. Specific diameter depends on configuration selected at order. Carry bag included with every unit.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain.

Expect full graphic life indoors with proper storage after each event.

Single/Double-Sided

Double-sided standard on every unit.

Both faces carry full-color printed graphics so the display brands every direction it faces.

Weight

Roughly 8 to 25 lbs depending on display size. Carry bag included for transport.
