

Product Specification Sheet

Triangle Pop Out Banners

Triangle Pop Out Banners use a spring steel frame and 65g peach skin fabric to cover three directions from a single freestanding footprint. Each panel prints double-sided using dye sublimation, so every face carries full-color branding regardless of which direction traffic approaches. Here's the thing: no other pop out shape covers a full aisle intersection the way a triangle does.

Material

65g peach skin fabric (lightweight polyester with a smooth surface).

Holds dye sublimation ink without surface glare, so graphics stay crisp under trade show lighting.

Print Method

Dye sublimation.

Ink converts to gas and bonds into fabric fibers, so color does not crack, peel, or fade with repeated folding.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black combined).

Covers the full visible color range, so brand colors, gradients, and photography reproduce accurately.

Finishing

Spring steel frame (pops open from flat, holds triangular shape under its own tension, no locking pins needed).

No tools. No assembly steps.

Size Range

Sizes listed on the product configurator.

Contact us if you need a size outside the standard range.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain.

With normal use and proper storage, indoor displays typically last 12 months or longer.

Single/Double-Sided

Double-sided standard on all units.

Both faces print the same graphic, so every panel faces outward with full branding.

Weight

8 to 25 lbs depending on display type and size. Carry bag included with every unit.

Lighter configurations fit easily in a car trunk for weekly multi-event transport.
