

Product Specification Sheet

Sky Tube Circle Hanging Banners

Sky Tube Circle Hanging Banners mount from the ceiling on a lightweight aluminum tube frame, printed on stretch fabric using full-color dye sublimation. The circle shape is the most popular sky tube option because it gives you 360-degree visibility from every direction on a crowded show floor.

Material

Stretch fabric sock over a lightweight aluminum tube frame with bungee cord connections. The fabric tensions tight over the frame so the graphic hangs smooth at ceiling height.

Print Method

Dye sublimation, where ink converts to gas and bonds directly into the polyester fibers. Colors absorb into the material rather than sitting on the surface, so the image stays crisp with no glare.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black, the 4-color printing process) across the entire graphic area.

Gives you accurate color matching for logos and brand colors.

Finishing

Stretch fabric sock graphic with hanging cables included for ceiling mounting.

The frame breaks into tube sections and stores in the included carry bag.

Size Range

Circle diameter runs 3 ft, 4 ft, 5 ft, or 6 ft.

A 3 to 4 ft circle suits a 10x10 ft booth. A 5 to 6 ft circle suits a 10x20 ft or island booth.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain.

Minimum recommended ceiling clearance is 10 ft. Most convention centers and large retail spaces meet this.

Single/Double-Sided

Available in single-sided (white or black backer) or double-sided (graphic on both faces).

A fully printed base section is also available.

Weight

Roughly 8 to 25 lbs depending on display type and size.

The carry bag is included with every order so the full kit travels in one bag.
