

Product Specification Sheet

Sky Tube Curved Triangle Hanging Banners

Sky Tube Curved Triangle Hanging Banners hang from the ceiling on a lightweight aluminum tube frame. The stretch fabric sock tensions smooth over the 3-sided curved triangle shape. Built for indoor trade shows, convention centers, and retail spaces with at least 10 ft of ceiling clearance. Here's what's inside every kit.

Material

Stretch fabric sock. Knit polyester sleeve that pulls over the frame and tensions wrinkle-free when the frame is fully assembled.

Print Method

Dye sublimation. Ink converts to a gas under heat and bonds directly into the polyester fibers so colors don't crack or peel.

Color Output

CMYK full color. Cyan, magenta, yellow, and black combine to reproduce any brand color, gradient, or logo accurately.

Finishing

Bungee cord connections. Elastic cords inside each aluminum tube section snap the frame together and break it back down for storage.

Size Range

Curved triangle shape with 3 sides and rounded edges. Exact dimensions vary by configuration. Contact us to confirm the size that fits your booth footprint and ceiling clearance.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain. Ceiling clearance of at least 10 ft is recommended.

Single/Double-Sided

Available in single-sided or double-sided print. Each option includes white backer, black backer, or printed base section.

Weight

Approximately 8 to 25 lbs depending on display type and size. Carry bag holds frame sections, fabric sock, and hanging cables together.
