

Product Specification Sheet

Sky Tube Football Hanging Banners

Sky Tube Football Hanging Banners hang from the ceiling on a lightweight aluminum tube frame covered by a stretch fabric sock printed in full-color CMYK. The football shape (an oval with pointed ends) suits sports, automotive, fitness, and any brand that reads as active or fast-moving. Indoor use only. Minimum 10 ft ceiling clearance recommended.

Material

Stretch fabric sock over a lightweight aluminum tube frame with bungee cord connections.

The fabric tensions tight over the frame so the graphic hangs smooth and wrinkle-free at ceiling height.

Print Method

Dye sublimation, where ink converts to a gas and bonds directly into the polyester fibers.

Colors stay crisp under convention hall lighting without surface glare washing them out.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black, the standard 4-color printing process).

Every color in your artwork prints accurately across the full football-shaped graphic.

Finishing

Stretch fabric sock pulls over the assembled aluminum tube frame. No tools needed.

The sock tensions the graphic flat and smooth across the entire display surface.

Size Range

Football shape (oval with pointed ends). Exact size options vary by configuration.

Match your size to your booth footprint before selecting so the display isn't undersized in a large hall.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain. Minimum 10 ft ceiling clearance recommended.

Below 10 ft, the display blocks sight lines and feels cramped.

Single/Double-Sided

Single-sided or double-sided print options available. White backer, black backer, or printed base section.

Choose double-sided if attendees approach your booth from both directions along an open aisle.

Weight

Approximately 8 to 25 lbs depending on display type and size. Carry bag included with every order.

The full kit (frame sections, fabric sock, and hanging cables) travels in one bag.
