

Product Specification Sheet

Sky Tube Rectangle Hanging Banners

Sky Tube Rectangle Hanging Banners mount from the ceiling on a lightweight aluminum tube frame with bungee cord connections, covered by a stretch fabric sock graphic. Two wide faces and two narrow faces give booths along a single main aisle maximum overhead visibility. Sizes run 3x4 ft to 5x8 ft, and every kit ships with hanging cables and a carry bag.

Material

Stretch fabric sock over a lightweight aluminum tube frame with bungee cord connections.

The fabric tensions over the assembled frame and hangs wrinkle-free at ceiling height without tools.

Print Method

Dye sublimation, where ink converts to a gas and bonds directly into the polyester fibers.

Colors come out bold and stay sharp without a surface coating that can crack or peel.

Color Output

Full-color CMYK across the entire graphic area on every order.

Gradients, photography, and multi-color logos all reproduce accurately across both wide faces.

Finishing

Stretch fabric sock graphic slides over the assembled frame.

Options include single-sided or double-sided prints with a white backer, black backer, or printed base section.

Size Range

Rectangle sizes run 3x4 ft to 5x8 ft.

Wide faces carry full messaging. Narrow faces typically show a logo or icon.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain.

Minimum recommended ceiling clearance is 10 ft for safe hanging without blocking sight lines.

Single/Double-Sided

Single-sided or double-sided printing available on every order.

Double-sided adds a full-color graphic layer so both wide faces carry complete content.

Weight

Roughly 8 to 25 lbs depending on size, with a carry bag included.

The frame breaks into tube sections for transport from parking to show floor.
