

Product Specification Sheet

Sky Tube Square Cube Hanging Banners

Sky Tube Square Cube Hanging Banners are ceiling-mounted 3D box displays built for high-ceiling trade show venues and large event spaces. The square cube shape gives you 5 printable faces: 4 vertical sides plus a bottom face visible to anyone standing directly below. Stretch fabric over an aluminum tube frame keeps the graphic smooth at ceiling height.

Material

Stretch fabric sock over a lightweight aluminum tube frame with bungee cord connections.

The fabric tensions tight over the frame so the graphic stays smooth without sagging at ceiling height.

Print Method

Dye sublimation, where ink heats into a gas and bonds directly into the polyester fibers.

Colors stay bold and do not crack or peel over repeated use.

Color Output

Full-color CMYK across all 5 printable faces: 4 vertical sides and the bottom face.

Each face prints independently, so sides can carry different messaging or a consistent wrap.

Finishing

Stretch fabric sock pulls over the assembled aluminum frame without tools.

The sock holds its shape under tension and stays smooth once installed.

Size Range

Square cube shape available in sizes from 3 ft to 5 ft per side.

Confirm your exact size at checkout based on your booth footprint and ceiling clearance.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain. Minimum recommended ceiling clearance is 10 ft.

Most convention centers and large event venues typically meet this clearance without issue.

Single/Double-Sided

Single-sided and double-sided graphic options available. White or black backer, or a printed base section on the bottom face.

Choose the printed base if the bottom face carries key branding for visitors below.

Weight

Approximately 8 to 25 lbs depending on display size. Carry bag included.

The full kit, frame sections plus fabric sock plus hanging cables, fits in one carry bag.
