

Product Specification Sheet

Sky Tube Square Hanging Banners

Sky Tube Square Hanging Banners mount to the ceiling on a lightweight aluminum tube frame and display full-color stretch fabric graphics on all 4 faces. These banners suit large indoor venues where overhead visibility above the crowd is the goal. Here's what's inside every kit.

Material

Stretch fabric sock over a lightweight aluminum tube frame with bungee cord connections.

The fabric tensions itself smooth when the frame is fully assembled, keeping the graphic flat and readable at ceiling height.

Print Method

Dye sublimation, a process where ink converts to a gas and bonds directly into the polyester fibers.

Colors stay bold and do not sit on the surface where they can crack or peel over time.

Color Output

Full-color CMYK across all 4 faces. CMYK is the 4-color process using cyan, magenta, yellow, and black.

This reproduces logos and photography accurately on every face.

Finishing

Bungee cord assembly on the aluminum tube frame. Hanging cables included for ceiling mounting. Carry bag holds the full kit.

No tools needed at any stage of assembly or breakdown.

Size Range

3 ft to 5 ft square (each side).

A 3 to 4 ft square suits a 10x10 ft booth. A 5 ft square suits a 10x20 ft or island booth.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain. Minimum recommended ceiling clearance is 10 ft.

Lifespan depends on storage and handling between events.

Single/Double-Sided

Single-sided or double-sided print options available.

Double-sided adds a printed backer visible from inside the frame structure.

Weight

Roughly 8 to 25 lbs depending on display type and size.

The carry bag holds frame sections, fabric sock, and hanging cables as one transportable kit.
