

Product Specification Sheet

Sky Tube Triangle Hanging Banners

Sky Tube Triangle Hanging Banners hang from the ceiling on a lightweight aluminum tube frame with bungee cord connections, covered by a stretch fabric sock graphic. The triangle shape gives you 3-sided overhead visibility, pointing each face toward a different aisle or direction. Built for indoor trade shows, large convention centers, and high-ceiling retail environments.

Material

Stretch fabric sock over a lightweight aluminum tube frame with bungee cord connections.

The fabric tensions tight over the frame so the graphic hangs smooth and wrinkle-free at ceiling height.

Print Method

Dye sublimation, where ink converts to a gas and bonds directly into the polyester fibers.

Colors stay crisp and do not crack or peel the way surface-printed vinyl can.

Color Output

Full-color CMYK across all 4 print channels.

Every color in your logo or artwork reproduces accurately without color-matching limitations.

Finishing

Stretch fabric sock pulls over the assembled aluminum tube frame. Hanging cables attach to the frame for ceiling mounting. A carry bag holds the full kit.

Size Range

Triangle shape. Match your sky tube size to your booth footprint: a smaller triangle suits a 10x10 ft booth, a larger one suits a 10x20 ft or island booth.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain. Minimum recommended ceiling clearance is 10 ft.

Single/Double-Sided

Single-sided or double-sided print available. White backer, black backer, or printed base section depending on your visibility needs.

Weight

Roughly 8 to 25 lbs depending on display type and size. Full kit including frame, fabric sock, hanging cables, and carry bag ships together in one oversized box.
