

Product Specification Sheet

Step and Repeat Curved Tension Fabric Displays

Step and Repeat Curved Tension Fabric Displays combine an EZ Tube aluminum snap-together frame with a dye-sublimated pillow-case fabric graphic in a gently bowed curved configuration. Available in 8 ft and 10 ft sizes, these displays suit press events, award ceremonies, and brand activations where logo clarity in photography is the top priority.

Material

Tension polyester fabric in a pillow-case sleeve that zips around the EZ Tube aluminum frame.

The sleeve hides all hardware and holds the graphic smooth and taut across the curved surface.

Print Method

Dye sublimation converts ink into a gas that bonds directly into the polyester fibers.

The bonded ink produces a matte surface with no glare under camera flash and no peeling over repeated use.

Color Output

Full CMYK (cyan, magenta, yellow, and black) 4-color printing across the full graphic surface.

Logo colors reproduce accurately at any position along the curved display.

Finishing

Pillow-case sleeve with printed end caps covering frame edges so no aluminum appears in photos.

The end caps are included with every order.

Size Range

Available in 8 ft and 10 ft booth sizes.

The 8 ft size suits most single-subject photo areas. The 10 ft covers wider group shots or larger booth backwalls.

Indoor/Outdoor Rating

Rated for indoor use only. Not rated for outdoor wind or rain.

Indoor displays typically last through many events when stored and handled correctly.

Single/Double-Sided

Single-sided printing with printed end caps included.

This suits all standard photo wall setups where the camera faces the display from one direction.

Weight

8 to 25 lbs depending on display size. Carry bag included with every order.

The bag holds the full hardware kit for transport between venues.
