

Product Specification Sheet

Step and Repeat Fabric Banners

Step and Repeat Fabric Banners run on 230 GSM matte polyester printed with dye sublimation. No frame hardware is included. They hang with pole pockets or velcro and work best as indoor photo walls where flash photography is guaranteed.

Material

230 GSM polyester fabric with a matte, wrinkle-resistant surface.

The matte finish absorbs camera flash so logos stay visible in photos without hot spots.

Print Method

Dye sublimation bonding ink directly into the polyester fibers.

Colors stay bold and crisp through washing and repeated use across multiple events.

Color Output

Full-color CMYK across the entire banner surface.

Every logo color in your artwork prints accurately from edge to edge.

Finishing

Pole pockets or velcro attachment. No additional hardware needed.

The banner hangs flat against a wall, pipe-and-drape system, or any horizontal pole.

Size Range

Custom sizes available. Most photo wall orders run 8 ft wide for 1 to 3 people, or 10 to 12 ft wide for groups of 4 to 8.

Height should clear standing adults with room above, typically 7 ft or taller.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain.

Expect reliable performance across 12 or more months indoors with proper care.

Single/Double-Sided

Single-sided. The repeating logo pattern prints on the front face only.

Single-sided is standard for all photo wall backdrops used in press and event settings.

Weight

8 to 25 lbs depending on size. A carry bag is included with every order.

Lighter orders (roughly 8 to 10 lbs) suit solo setup. Larger sizes need two people.
