

Product Specification Sheet

Step and Repeat fabric pop up curved displays

Step and Repeat fabric pop up curved displays use a spring-loaded accordion frame paired with a dye-sublimated tension fabric graphic in a gently curved shape. The matte polyester surface absorbs flash, making these displays the go-to choice for press events, galas, and corporate brand activations where photos are the primary deliverable.

Material

Tension fabric polyester graphic on a spring accordion frame.

The matte surface absorbs camera flash instead of reflecting it back at the lens.

Print Method

Dye sublimation (ink heats into a gas and bonds directly into the polyester fibers).

Colors stay bold and do not crack, peel, or fade the way surface-printed vinyl does.

Color Output

Full-color CMYK across the entire graphic surface.

CMYK uses cyan, magenta, yellow, and black to reproduce any logo color accurately.

Finishing

Single-sided graphic with printed end caps.

End caps are the fabric panels that wrap the frame edges, keeping every visible side looking finished.

Size Range

Available in 8 ft and 10 ft booth sizes.

The 8 ft width suits 1 to 3 people. The 10 ft width gives groups of 4 or more room without crowding the frame edge.

Indoor/Outdoor Rating

Rated for indoor use only. Not rated for outdoor wind or rain.

Indoors, the fabric graphic typically holds its color for years with proper care.

Single/Double-Sided

Single-sided printing standard.

The curved frame faces one direction, so single-sided output covers every surface the camera sees.

Weight

8 to 25 lbs depending on size. A carry bag is included with every unit.

One person can transport the full display without additional cases or carts.
