

Product Specification Sheet

Step and Repeat S Shaped Tension Fabric Displays

Step and Repeat S Shaped Tension Fabric Displays run on a 10 ft aluminum EZ Tube frame in a serpentine S-curve configuration. The graphic is stretch polyester (a tight-weave fabric that pulls taut over the frame so the surface stays smooth with no visible wrinkles or sag). These displays suit galas, press events, and luxury brand activations where the backdrop itself carries as much weight as the logos printed on it.

Material

Stretch polyester fabric. Pulls taut over the EZ Tube frame so the graphic surface stays wrinkle-free and smooth.

Print Method

Dye sublimation. Ink converts to gas and bonds into the polyester fibers, giving a matte surface that won't crack or peel.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black combined to reproduce any brand color). Submit logo files in CMYK for the closest color match.

Finishing

Pillow-case sleeve. The fabric graphic zips around the frame, hiding all hardware so no connectors or tubes appear in photos.

Size Range

10 ft aluminum EZ Tube frame. The S-curve uses the full 10 ft span across the serpentine shape. Contact us for custom sizing.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain. Plan for a covered venue or enclosed event space.

Single/Double-Sided

Single-sided graphic display. Position the graphic face toward the camera and the frame back toward a wall or drape.

Weight

8 to 25 lbs depending on display type and size. The included carry bag holds frame sections and fabric graphic for one or two-person transport.
