

Product Specification Sheet

Step and Repeat Straight Tension Fabric Displays

Step and Repeat Straight Tension Fabric Displays run on tension polyester fabric stretched over a snap-together EZ Tube aluminum frame. The pillow-case graphic zips around the frame, hiding all hardware and holding the surface flat across the full display width. These displays are built for indoor photo walls where a flat, flash-safe backdrop is the primary goal.

Material

Tension polyester fabric, pillow-case sleeve construction.

The fabric zips around the EZ Tube frame, hiding all hardware and keeping the graphic flat.

Print Method

Dye sublimation.

Ink converts to gas and bonds into the polyester fibers, so the surface stays matte and absorbs flash without glare.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black, the standard 4-color printing process).

Reproduces logos and brand colors accurately across the full display width.

Finishing

Pillow-case sleeve.

Fabric zips around the frame with no visible grommets, hooks, or exposed hardware on the display face.

Size Range

8 ft, 10 ft, and 20 ft widths.

The 8 ft fits a standard 10 ft trade show booth. The 20 ft covers large stage or ballroom backdrops.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain.

Stored properly between events, indoor displays typically hold up through multiple event seasons.

Single/Double-Sided

Single-sided or double-sided configurations available.

Single-sided is standard for photo walls against a wall. Double-sided works for island setups where both faces are visible.

Weight

Roughly 8 to 25 lbs depending on size. Carry bag included with every order.

The full kit transports in one trip without a cart.
