

Product Specification Sheet

5ft Fabric Pop Up Tabletop Displays

5ft Fabric Pop Up Tabletop Displays combine a collapsible aluminum pop-up frame with a polyester fabric graphic that attaches flat and taut across the full 60 in width. This is the widest single-panel tabletop display in our catalog. Best for 8 ft trade show tables where full-width branded coverage matters more than a curved shape.

Material

Polyester fabric graphic on a collapsible aluminum pop-up frame.

The fabric is washable and holds its shape flat against the frame without sagging.

Print Method

Dye sublimation.

Ink heats into a gas and bonds directly into the polyester fibers, so color cannot peel or sit on the surface.

Color Output

Full-color CMYK (cyan, magenta, yellow, and black combined).

Reproduces logos, photos, and gradients accurately across the full 60 in width.

Finishing

Collapsible pop-up frame expands and locks without tools. Fabric graphic attaches directly to the frame face.

Size Range

60 in wide (5 ft). Covers most of a standard 8 ft folding table.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain. Typical indoor display life runs well beyond 12 months with proper storage.

Single/Double-Sided

Single-sided printing on the front face. The back faces the table or wall and is not visible to attendees.

Weight

Lightweight aluminum frame. The complete kit stays in the lighter range of our display lineup and fits in the included carry bag for one-person transport.
