

Product Specification Sheet

Curved Tension Fabric Tabletop Displays

Curved Tension Fabric Tabletop Displays run a polyester pillow-case graphic on a snap-together aluminum EZ Tube frame. The curved shape bows gently forward at the center, giving your table a bold, structured backdrop at close range. This display suits indoor trade show tables, registration desks, and client-office presentations.

Material

Polyester fabric pillow-case sleeve.

Zips around the EZ Tube frame, hiding all hardware and pulling the graphic face smooth and taut.

Print Method

Dye sublimation (a process where ink converts to gas and bonds directly into the polyester fibers).

Colors bond into the fabric so they do not sit on the surface where they can crack or peel.

Color Output

Full-color CMYK across the entire graphic face.

Photographic images, gradients, and multi-color logos all reproduce accurately.

Finishing

Pillow-case sleeve zips around the curved EZ Tube frame and pulls tight on all sides.

The graphic stays taut without wrinkles or sagging during the event.

Shape

Curved. Gently bowed forward at the center.

Adds visual depth that a flat tabletop panel cannot match from 2 to 4 ft away.

Indoor/Outdoor Rating

Indoor use only. Not rated for outdoor wind or rain.

The polyester graphic holds its color and shape across repeated indoor events.

Single/Double-Sided

Single-sided printing on the front face.

The pillow-case back covers the frame cleanly so the display looks finished from behind as well.

Hardware

Aluminum EZ Tube frame. Snaps together without tools.

Same sturdy, lightweight system used on full-size Backdrops, scaled to tabletop size.
