

Product Specification Sheet

Custom Anniversary Banners

Custom Anniversary Banners print on PVC Flex vinyl in two weights, suited for both indoor reception halls and outdoor backyard celebrations. Each banner carries full-color CMYK personalization across the entire face, including names, years, and uploaded photos. These specs cover everything you need to order with confidence.

Material

PVC Flex vinyl, a smooth, glossy surface that holds ink evenly and resists moisture outdoors.

Banners wider or taller than 10 ft include a welded seam to keep the full surface flat and taut.

Print Method

Eco-solvent or UV inkjet printing bonds weather-resistant inks directly to the vinyl surface.

Colors stay crisp through sun and light rain without fading or peeling.

Color Output

CMYK full color, the 4-color process using cyan, magenta, yellow, and black.

Reproduces photos, gradients, and bold text accurately across the full banner face.

Finishing

Brass grommets every 2 ft. Pole pockets along the top or bottom edge. Hem and heat weld for frame systems.

Pick your finish before uploading artwork so hardware placement doesn't cut into your design.

Size Range

Custom sizing available, from roughly 2 ft x 4 ft tabletop formats up to larger outdoor spans.

Banners over 10 ft in either dimension include a welded seam.

Indoor/Outdoor Rating

Both indoor and outdoor use. Outdoor banners with UV-resistant inks hold color for about 6 to 12 months in direct sun.

Indoor banners last longer because they avoid UV exposure and moisture entirely.

Single/Double-Sided

Single-sided is standard for wall-mounted and fence displays. Double-sided uses a blockout liner (a white layer between front and back prints) to prevent image show-through.

Weight

11 oz for indoor reception halls and light-duty indoor walls. 16 oz for outdoor backyard parties, garden setups, and locations with sustained wind or direct sun.
