

Product Specification Sheet

Custom Baby Shower Banners

Custom Baby Shower Banners print in CMYK full color on smooth PVC Flex vinyl, built for indoor celebrations and short outdoor party setups. Both weights handle the typical baby shower or gender reveal venue, from a living room wall to a backyard pergola. Here's what you get on every order.

Material

PVC Flex vinyl. A smooth, glossy surface that holds ink evenly and resists light moisture throughout the event.

Print Method

Eco-solvent or UV inkjet. Both methods bond ink to the vinyl surface and hold color under indoor lighting without fading.

Color Output

CMYK full color. Reproduces soft pastels, blush pinks, and bold gender reveal colors within the standard CMYK gamut.

Finishing

Brass grommets every 2 ft. Pole pockets along the top or bottom edge. Hem and heat weld for frame-mounted or backdrop stand displays.

Size Range

2 ft x 4 ft up to custom dimensions. Banners wider or taller than 10 ft include a welded seam where two panels join.

Indoor/Outdoor Rating

Both supported. Indoor banners last the full event without wear. Outdoor use in direct sun rates roughly 6 to 12 months with UV-resistant inks.

Single/Double-Sided

Single-sided is standard for wall and backdrop displays. Double-sided uses a blackout liner (a white layer between front and back prints) to stop image show-through.

Weight

11 oz for lightweight indoor wall hangings and backdrop displays. 16 oz for doorway frames, outdoor pergolas, and setups needing extra hold under tension.
