

Product Specification Sheet

Custom Graduation Banners

Custom Graduation Banners print on PVC Flex vinyl in two weights built for two different jobs. The 11 oz weight handles indoor party backdrops, and the 16 oz weight handles outdoor yard displays through spring weather. Both weights carry full-color CMYK printing with your graduate's name, photo, school, and class year across every custom size.

Material

High Quality PVC Flex vinyl.

A smooth, glossy surface that resists moisture and holds ink color through sun and light rain.

Print Method

Eco-solvent or UV inkjet.

Both use weather-resistant inks that bond to the vinyl surface and hold color outdoors for 6 to 12 months.

Color Output

CMYK full color.

CMYK (cyan, magenta, yellow, black) reproduces photos and bold graphics across the full visible color range.

Finishing

Brass grommets every 2 ft. Pole pockets. Hem and heat weld.

Grommets are brass rings punched into the edges for hanging with hooks, zip ties, or rope.

Size Range

Custom sizes available.

Banners wider or taller than 10 ft include a welded seam (a heat-bonded join between panels that holds without visible gaps).

Indoor/Outdoor Rating

Indoor and outdoor use.

Outdoor vinyl holds up 6 to 12 months with UV-resistant inks. Indoor use extends life well beyond that.

Single/Double-Sided

Single-sided standard. Double-sided with blockout liner available.

The blockout liner is a white layer between front and back prints that stops ink from showing through.

Weight

11 oz for indoor and light-duty outdoor. 16 oz for yard displays and fence mounts.

The heavier the weight, the longer it holds shape in wind and direct sun.
