

Product Specification Sheet

Custom Party Banners

Custom Party Banners print on PVC Flex vinyl in 11 oz or 16 oz weights, giving you a sturdy, smooth surface for full-color photos and bold text. These banners work indoors and outdoors, and most orders ship within 1 to 2 business days.

Material

PVC Flex vinyl.

A smooth, glossy surface that resists moisture and holds ink color for roughly 6 to 12 months in direct sun.

Print Method

Eco-solvent or UV inkjet.

Weather-resistant inks bond directly to the vinyl surface so colors stay crisp through rain and sun.

Color Output

CMYK full color (cyan, magenta, yellow, and black combined in one pass).

Reproduces photos, gradients, and bold text accurately across the full printed surface.

Finishing

Brass grommets every 2 ft. Pole pockets (fabric sleeves along the top or bottom edge for a rod). Hem and heat weld (folded, heat-sealed edges for a clean, reinforced finish).

All three options are available at checkout.

Size Range

Custom sizes from 2 ft x 3 ft up to large formats.

Banners with a width or height over 10 ft include a welded seam (a heat-bonded join that keeps the full panel sound).

Indoor/Outdoor Rating

Rated for both. Outdoor life is roughly 6 to 12 months with UV-resistant inks. Indoor banners typically last longer.

Single/Double-Sided

Single-sided is standard. Double-sided uses a blockout liner (a white layer between the two printed faces that stops one side from showing through).

Weight

11 oz for indoor and light-duty outdoor setups. 16 oz for heavy-duty outdoor displays where wind or longer exposure is a factor.
