

# Product Specification Sheet

## Custom Photo Banners

Custom Photo Banners turn a full-resolution photo or photo collage into a large-format print on PVC Flex vinyl or soft polyester fabric. Both materials are available in the configurator above. Custom Photo Banners work best for memorial tributes, birthday timelines, retirement collages, and team photo displays where the image needs to fill the entire banner face.

### Material

PVC Flex vinyl (smooth, glossy surface) or polyester fabric (soft drape, no glare).

Vinyl suits outdoor and indoor setups. Fabric is best for indoor receptions and memorial services.

### Print Method

Eco-solvent inkjet on vinyl. Dye sublimation on fabric.

Eco-solvent inks are weather-resistant and hold color outdoors roughly 6 to 12 months.

### Color Output

CMYK full color.

The 4-color process covers the full banner face so photo gradients reproduce accurately without banding.

### Finishing

Brass grommets every 2 ft. Pole pockets along top or bottom edge. Hem and heat weld border seal.

Each option suits a different hanging method: hooks, rods, or frames.

### Size Range

Custom sizes available. Banners wider or taller than 10 ft include a welded seam (a heat-bonded join line) to hold the full panel without tearing.

### Indoor/Outdoor Rating

Vinyl rates 6 to 12 months outdoors with UV-resistant eco-solvent inks. Fabric handles indoor use and light outdoor exposure only.

### Single/Double-Sided

Single-sided is standard. Double-sided adds a blockout liner (a white layer between front and back prints) that stops image show-through.

### Weight

11 oz vinyl for indoor or light-duty use. 16 oz vinyl for outdoor setups exposed to wind or direct sun.

Heavier weight resists edge tearing and wind stress on longer outdoor runs.
