

Product Specification Sheet

Custom Reunion Banners

Custom Reunion Banners print on PVC Flex vinyl in two weights built for the settings reunion organizers actually use: covered pavilions and open-air parks. Both weights carry full CMYK color across multi-photo layouts, family names, class years, and unit designations. Here's the thing: the weight you pick at checkout determines how the banner holds up when the afternoon wind picks up.

Material

PVC Flex vinyl. A smooth, glossy surface that resists moisture and holds ink through sun and light rain.

Print Method

Eco-solvent or UV inkjet. Weather-resistant inks bond directly to the vinyl surface so colors stay sharp outdoors.

Color Output

CMYK full color (cyan, magenta, yellow, and black combined). Reproduces family photos, school colors, and unit insignia across the full visible color range.

Finishing

Brass grommets every 2 ft. Pole pockets or hem and heat weld also available to match your hanging setup.

Size Range

Custom sizing available. Common reunion sizes run roughly 3 ft x 6 ft for indoor walls up to 5 ft x 10 ft for outdoor park displays.

Indoor/Outdoor Rating

Rated for both. Outdoor display with UV-resistant inks typically lasts 6 to 12 months. Indoor display lasts longer.

Single/Double-Sided

Single-sided is standard. Double-sided includes a blockout liner between printed faces to prevent show-through.

Weight

11 oz suits covered and indoor reunion spaces. 16 oz handles open-air outdoor setups where wind and weather are factors.
