

Product Specification Sheet

Custom 4th of July Banners

Custom 4th of July Banners print on PVC Flex vinyl in 11 oz or 16 oz, built for outdoor patriotic displays from May through July. Full-color CMYK output keeps red, white, and blue tones accurate across every order. Both weights suit outdoor use, with 16 oz handling open-air mounts and sustained wind.

Material

PVC Flex vinyl, a smooth glossy outdoor material available in 11 oz and 16 oz.

The heavier weight adds stiffness for open-air mounts where the face takes direct wind.

Print Method

Eco-solvent or UV inkjet printing.

Both lay weather-resistant inks that hold color outdoors for roughly 6 to 12 months in direct sun.

Color Output

CMYK full color (cyan, magenta, yellow, and black), the standard 4-color printing process.

Patriotic red, white, and blue tones reproduce accurately within the CMYK gamut.

Finishing

Brass grommets every 2 ft along the edges. Pole pockets along the top or bottom edge.

Hem and heat weld for frame mounts.

Pick one option at checkout based on how and where the banner hangs.

Size Range

Custom sizing available across both weights.

Banners wider or taller than 10 ft include a welded seam, a heat-fused join that keeps the face flat at large formats.

Indoor/Outdoor Rating

Rated for both indoor and outdoor use.

Outdoor life runs 6 to 12 months with UV-resistant inks. Stored rolled and dry, most banners last 3 or more years.

Single/Double-Sided

Single-sided is standard. Double-sided uses a blockout liner, a white layer between the two printed faces that stops show-through.

Most patriotic display setups need single-sided only.

Weight

11 oz for covered outdoor areas, lobbies, and indoor venues. 16 oz for open-air parade routes, storefront facades, and fence mounts.

Choose your weight in the configurator before uploading your file.
