

Product Specification Sheet

Custom Halloween Banners

Custom Halloween Banners print on PVC Flex vinyl in two weights, built for everything from indoor party walls to heavy outdoor yard displays. The material is smooth, glossy, and moisture-resistant, which makes it the right call for fall weather conditions. Here's what you get on every order.

Material

PVC Flex vinyl.

A smooth, glossy surface that resists moisture and holds ink without cracking through fall weather.

Print Method

Eco-solvent or UV inkjet.

Weather-resistant inks bond directly to the vinyl surface so colors stay bold through rain and direct sun.

Color Output

CMYK full color (cyan, magenta, yellow, and black, the standard 4-color printing process).

Reproduces spooky oranges, deep purples, and sharp whites accurately across the full design.

Finishing

Brass grommets every 2 ft. Pole pockets (fabric sleeves for a rod or pole). Hem and heat weld (folded edges sealed with heat).

All three options are available at order.

Size Range

Custom sizing from small porch displays up to large building-facade banners.

Banners with a width or height over 10 ft include a welded seam for structural strength.

Indoor/Outdoor Rating

Rated for both indoor and outdoor use.

Outdoor banners with UV-resistant inks typically last 6 to 12 months, well past the Halloween season.

Single/Double-Sided

Single-sided is standard. Double-sided uses a blockout liner between the two printed faces to prevent show-through.

Weight

11 oz for indoor party walls and light-duty outdoor use. 16 oz for heavy-duty outdoor displays in wind-exposed locations like fences, porches, and building facades.
