

Product Specification Sheet

Custom Band Banners

Custom Band Banners run on two materials: PVC Flex vinyl for outdoor gigs and polyester fabric for indoor stages. Both carry full-color band artwork without fading under normal gig conditions. Here's the thing: the material you pick determines how the banner travels, hangs, and holds across the tour.

Material

PVC Flex vinyl (smooth, glossy, built for outdoor signage). Polyester fabric (soft, drapes naturally, no glare under stage lighting).

Each material handles a different venue type without overlap.

Print Method

Eco-solvent or UV inkjet for vinyl. Dye sublimation for fabric, where ink absorbs into fibers so the image won't crack or peel.

Dye sublimation survives repeated rolling and unrolling across 20 or more shows.

Color Output

CMYK full color (cyan, magenta, yellow, and black), covering most band logo colors and album art palettes within the standard gamut.

RGB files convert to CMYK at proof stage, which can shift some colors slightly.

Finishing

Brass grommets every 2 ft, pole pockets, or hem and heat weld (edges folded and sealed with heat for a reinforced border).

Each option suits a different mounting setup at a venue or festival.

Size Range

Custom sizing available. Banners wider or taller than 10 ft include a welded seam to handle the full span without sagging.

Order the size that fits your stage or fence, not a fixed standard.

Indoor/Outdoor Rating

Vinyl rates 6 to 12 months outdoors with UV-resistant inks. Fabric is built for indoor use and handles light outdoor conditions only.

Do not use fabric for prolonged rain or sustained wind exposure.

Single/Double-Sided

Single-sided is standard. Double-sided uses a blackout liner, a white layer between front and back prints, to prevent image show-through.

Double-sided works for banners visible from both sides of an entrance or walkway.

Weight

Vinyl runs 11 oz for indoor and light-duty use or 16 oz for outdoor festivals and high-traffic touring setups.

The heavier the weight, the more physical handling it survives across a full tour run.
