

Product Specification Sheet

Custom Soccer Banners

Custom Soccer Banners run on PVC Flex vinyl (a smooth, glossy material built for outdoor fence mounting) in 11 oz or 16 oz weights. They print via eco-solvent or UV inkjet with full-color CMYK output. Most field fence orders land at 3 ft x 5 ft or 4 ft x 6 ft, sized to match standard soccer fence heights without trimming.

Material

PVC Flex vinyl. Smooth, glossy surface resists moisture and holds its shape through wind and rain outdoors.

Print Method

Eco-solvent or UV inkjet. Weather-resistant inks bond directly to vinyl and stay sharp for 6 to 12 months outdoors.

Color Output

CMYK full color (cyan, magenta, yellow, and black combined). Reproduces team colors, sponsor logos, and player photos accurately.

Finishing

Brass grommets every 2 ft (standard). Pole pockets and hem and heat weld are also available for different mounting setups.

Size Range

Most soccer fence banners run 3 ft x 5 ft or 4 ft x 6 ft. Sponsor banners can reach 4 ft x 20 ft along a full fence section. Banners wider or taller than 10 ft include a welded seam for structural support.

Indoor/Outdoor Rating

Rated outdoors 6 to 12 months with UV-resistant inks. Indoor gymnasium or banquet use extends life well beyond that range.

Single/Double-Sided

Single-sided is standard for fence-mounted banners. Double-sided with a blackout liner (a white layer that stops show-through between front and back prints) is available.

Weight

11 oz for indoor display or short outdoor seasons under 3 months. 16 oz for full outdoor seasons, high-wind field locations, or year-round fence mounting.
